CERTIFICATE

This is to certify that Report entitled “Online Restaurant Search” which is submitted by **Mohammed Faraz Anwer (1203510319), Kshitiz Kumar Gupta (1203510043), Vaibhav Shrimali (1203510342)** in partial fulfillment of the requirement for the award of degree B.Tech. in Computer Science & Engineering to Dr. APJAK Technical University, Lucknow during the academic year 2015-2016, is a record of the candidate own work carried out by him under my supervision.

Project Guide:

Mr. Amit Kumar Sharma

Asst. Professor

Department of CSE

Head of Department:

Dr. Amit Singhal

Professor

Department of CSE

ACKNOWLEDGEMENT

We take this opportunity to express our sincere thanks and deep gratitude to our project guide Mr. Amit Kumar Sharma who shared his time and knowledge with us and helped in completing this project successfully.

It is with the immense pleasure and heartfelt gratitude. We express our sincere thanks to our project coordinator Mr. Amit Kumar Sharma for his useful suggestions, continuous guidance, and moral support for the progress of my work.

We express our sincere gratitude to Professor (Dr.) Amit Singhal, Head of Department (CSE) for his strict supervision, constant encouragement, inspiration and guidance. His inspiring suggestions and timely guidance enabled us to perceive the various aspects of the project with a new vision.

We are very much grateful to our parents for their support and faith they showed in us. Last but not the least our friends for being there round the clock whenever we needed them.

ABSTRACT

The concept of online restaurant search system, since it is a web application, I will keep everything as simple as possible. The project can be used by the registered users to look up for restaurant in their surroundings, read the reviews of people visited there, look for offer of the day and also look up the menu of all the restaurants in their respective area. This application, created mainly for helping the people in looking up for restaurants.

The restaurant list comes up according to the average rating as per given by the user which helps other user to wisely choose the restaurant before going there. Each restaurant has a menu, its offer of the day and its contact details.

“Online Restaurant Search” is a web application to find restaurant. This system works to provide service facility to restaurant and also to the customer. The service that is provided is restaurant choosing and ordering via the contact details or itself going to the restaurant. With this system, choosing restaurant will become easier to choose from.
